Description:

- An overview of descriptive and inferential statistics without formulas and computations.
- Clear and to-the-point narrative makes this short book perfect for all courses in which statistics are discussed.

- Helps statistics students who are struggling with the concepts. Shows them the meanings of the statistics they are computing.
 - This book is easy to digest because it is divided into short sections with review questions at the end of each section.
 - Running sidebars draw students' attention to important concepts.
